

# PO RIVER REGAINED

## THE NEW PIACENZA LANDSCAPE

31 AUGUST 2020 | 11 SEPTEMBER 2020

THIRD LECTURE | 07 SEPTEMBER 2020

**h 18.00**  
**Mario Súñer**  
(Batlle i Roig  
Arquitectura)

Mario Súñer is the Senior Associate and Vice Director of the Landscape Department within the Barcelona based Batlle i Roig design firm. Among the leading architectural offices at international level, Batlle i Roig experienced an integrated and complex approach between architecture and landscape. Some of their most recent projects are discussing a very wide concept of environment, involving also side effects and impacts of contemporary and contradictory developments. Program for Llobregat River Recovery in Barcelona with a new system of integrated mobility lines such as the awarded Landscape restoration of Garraf Waste Landfill are remarkable examples of design potentialities in situations and conditions very similar to the ones proposed in the LOL workshop.
