MOVING WATERS

PO RIVER LANDSCAPE IN THE ANTHROPOCENE ERA

04 – 16 SEPTEMBER 2023

LANDSCAPE OF[F] LIMITS IS AN INTERNATIONAL DESIGN WORKSHOP ORGANIZED BY POLITECNICO DI MILANO, PIACENZA CAMPUS AND ITS MASTER DEGREE IN SUSTAINABLE ARCHITECTURE AND LANDSCAPE DESIGN.

In its 4TH EDITION, the workshop focuses on landscape, urban and architectural transformations taking place in relation to the Po River. Its section from Piacenza to Cremona will be studied following two main themes:

WATER as an element and factor that builds territorial forms and natural ecosystems. Nowadays climate change and environmental crisis are producing extreme phenomena, from water scarcity to devastating floods, increasing risk situations and the dramatic loss of ecological, economic, social and cultural values.

ENERGY as the integration of places, infrastructures and forms of land use capable of generating productive landscapes.

Along the Po River, the energy landscape traditionally organized around hydroelectric plants and the Caorso nuclear power plant (in an advanced stage of decommissioning) is now the subject of numerous research aimed at increasing its ecological and environmental compatibility, generating new values and functions within the complex system of ecosystem services.

In this perspective, the Po – with its complex system of surface and underground waters – becomes, together with the territories it crosses, an exemplary case study and an extraordinary opportunity for the application and experimentation of the most recent water-sensitive design strategies.
